## **175 Watts AC to DC Supply Breaks New Ground in Power Density and Feature Set for 2X4 Board Space**

Ventura, California, January 16, 2012 - SL Industries (NYSE/AMEX: SLI). SL Power Electronics, a division of SL Industries, and manufacturer of both internal and external power supplies, introduced the highly dense and feature packed CINT1175 product family with 175 watts of output power and 5 different models ranging from 12 to 56V. Over 90% efficiency, secondary output of 12V, and interface signals are among the standard specifications for this single output ultra-dense family of power supplies. With less than 1.3" in height and compact size, the CINT1175 can easily fit in 1U chassis. CE marked to low voltage directive and approval to ITE standards by safety agency regulatory bodies makes it an ideal choice for worldwide applications. It also meets Level V average efficiency requirements of Energy Star and ErP 2.

The CINT1175 product line is designed to meet the stringent EMC requirements for Industrial and ITE applications. In addition, they have been HALT tested for durability/reliability, and are offered with 3 year warranty.

Greg Harris, Executive Vice President of Sales at SL Power, commented, "With the introduction of CINT1175 family, we are raising the bar for what is possible in power density on 2X4 board size. Combining it with interface signals, the flexibility of system integration is limitless."

These supplies are readily available through SL Power's extensive distribution sales channels and offered at \$80 for 500 piece orders.

### **About SL Power Electronics**

SL Power Electronics Corp. designs, manufactures and markets internal and external power supplies for medical, communications, computer and industrial electronic OEMs. The company is a global leader in the development of AC/DC and DC/DC standard, modified and custom power supplies. The product offering includes a broad range of AC/DC and DC/DC open-frame switch mode and linear power supplies from seven to 6000 watts under the Condor brand name and an external AC/DC switch mode power supply offering from six to 220 watts, as well as transformers, battery chargers and DC mobile adapters under the Ault brand name.
